1.SURVEY METHODOLOGY AND RESPONSE RATE

The questionnaire was compiled by Matthew Owens, Rural Housing Enabler for Pembrokeshire and approved by the Local Government Data Unit (Wales), Pembrokeshire County Council, Pembrokeshire Coast National Park Authority and Hook Community Council.

Section 1 was completed by all respondents and focussed on

- . Type of homes and number of bedrooms
- . Tenure of households
- . Age & sex profile of households
- . Length of residence
- . Potential new households in need of housing

Section 2 was completed by potential households in housing need and focussed on

- . Reason for being unsuitably housed
- . Age profile of potential households
- . Household composition
- . Time scales of need
- . Special needs requirements
- . Preferred tenure and type of accommodation required
- . Affordability of rent or mortgage
- . Connections to community

Section 3 was completed by all respondents and focussed on

- . Support for provision of affordable housing developments
- . Personal comments regarding affordable housing in the area
- . Possible development sites in the area

Sampling

Survey forms were distributed by second class post on the 2nd of October 2007, this was facilitated by the Rural Housing Enabler. The questionnaires were sent to all 283 addresses on the council tax register for the Hook Community Council area. The address list was provided by Pembrokeshire County Council.

Respondents were given 14-21 days to complete the survey, They were then instructed to return the completed questionnaires in the second class freepost envelope provided. The deadline for the return of the surveys was the 27th of October 07.

Included with each survey was an accompanying explanatory letter from the Community Council (**see appendix 2**) and a questionnaire (**see appendix 3**).

The form only allowed one household per property to identify itself in need. Additional household and non-resident forms were available from the Rural Housing Enabler, No additional household or non-resident questionnaires were requested. A total of 283 surveys were distributed.

Response

A total of 131 questionnaires were returned to the Rural Housing Enabler for data entry and analysis. A total of 126 questionnaires were returned from occupied households. All were completed or part-complete. Three questionnaires were returned incomplete and two were returned after the 27th of October deadline.

The three incomplete and two late Questionnaires were discounted from the analysis.

According to the figures from the council tax office, of the addresses identified in the Hook area, 7 properties are currently unoccupied and 3 are currently used as holiday homes. This provides us with a figure of 273 occupied households in the Community Council area. This equates to a return rate from the occupied households of 46% (126/273). Which is a good rate of return compared to other housing needs surveys carried out in Pembrokeshire over the last few years.

2. SUMMARY OF ANALYSIS

Percentages in this section apply to the number of respondents to the survey who answered that particular question. This is known as adjusted percentage.

The overall response rate from occupied households was 46%

17% of respondents identified a household in potential housing need over the next 5 years.

13% of respondents identified their current household as in need of moving over the next five years.

4% of respondents identified someone in their current household as in need of moving in the next 5 years, who would form new households within the community.

59% of respondents who identified a household in housing need stated they wanted to buy on the open market, 27% indicated they wanted to pay for the property by renting from a Local Authority or a Housing Association, 9% indicated they wanted to buy as a shared owner and 5% indicated they wanted to rent from the private sector.

76% of households who expressed a housing need detailed that need as within 3 years, 24% detailed that need with the next 3 to 5 years.

62% of respondents who identified themselves as being in housing need, expressed a desire for 3 bedroom properties, 14% for 2 bedroom properties, 14% for 4 bedroom properties and 10% for 5 bedroom properties.

Of the households that identified a housing need 70% described their household as families (one or two adults with children), 20% as co-habiting/married couples and 10% as a single person household.

The majority of the people who identified themselves as being in housing need were aged between 20-44 years old.

81% of those expressing a housing need were not on the Local Authority or Housing Association, housing transfer or waiting list.

46.4% of respondents stated they would consider supporting a small development of affordable housing to meet local housing need, 31.3% of respondents said maybe and 22.3% said they wouldn't support it.

3. ANALYSIS OF THE SURVEY COMPLETED BY ALL HOUSEHOLDS

The purpose of part 1 of the questionnaire was to indicate the main housing patterns for the sample area.

Presentation broadly follows the questions set out on the survey form.

Percentages in this section apply to the number of respondents to the survey (126) who answered that particular question. This is known as adjusted percentage.

Q1. Is this your Main Home?

All 126 respondents stated their Hook address was their main home.

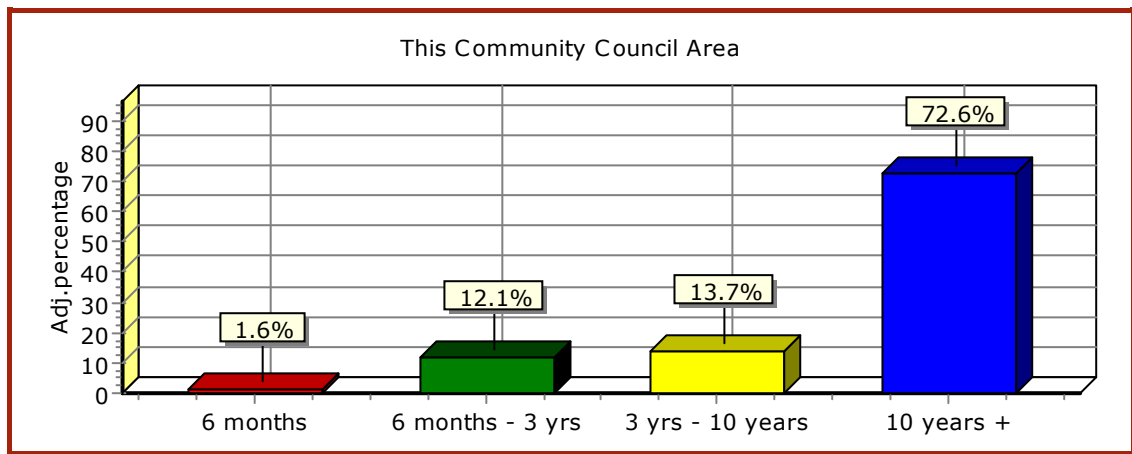

Q2. What type of house does your household live in?

Q3. Does your household own or rent this property?

Q4. How long have you lived in?

Q5. How many bedrooms does your home have?

Q6. How many people of each age and sex are there in your household?

The total number of people identified in respondents households was 303.

This equates to an average household size of 2.5 people (303/122)

Q7. Would your household, or anyone in your household, expect to need to move within the Hook area in the next 5 years?

Making a total number of respondents identifying themselves or a member of their household as being in housing need as 17%.

4. ANALYSIS OF THE SURVEY COMPLETED BY POTENTIAL MOVERS

The purpose of part 2 of the questionnaire was to identify those people in housing need and to indicate their housing requirements and reasons for housing need.

21 respondents completed this part of the form. The data in this section is presented by the actual number of responses to each question, rather than as a percentage of responses.

The total number of answers to each question is detailed at the end of the question name in brackets (not all respondents answer every question). Some questions allowed respondents to give more than one answer (these are known as multi-code questions), the total number of answers are again shown in brackets after the question name, but in this case with a TV for "total vote". Therefore the number of responses to a particular answer to this type of question is the number of "votes" that answer achieved.

Q8. How many people of each age and sex in the household that need to move? (21)

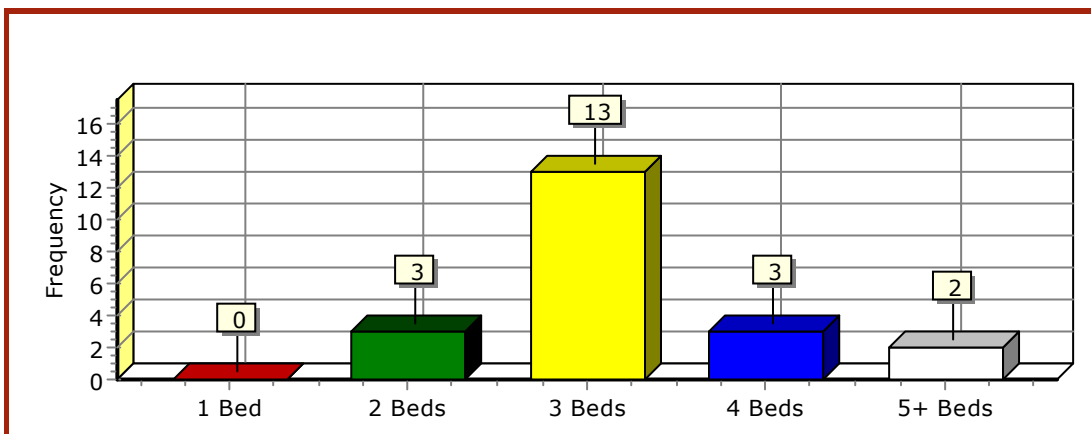

The response to this question shows us that the age group with the highest number of male and female respondents who have identified themselves as being in housing need is 20-44 age group.

In total 58 people in 21 households have identified themselves in need. This equates to an average household size of 2.8 people.

Q9. How would you describe this household? (20)

Q10. How many bedrooms would you expect to need? (21)

Q11. Why does your Current home not meet your needs? (TV = 18)

Q12. When would you expect to need to move? (21)

Q13. Does your household have a specialist housing need? (TV = 21)

Q14. How much would the household be able to afford if renting? (18)

Respondents were asked to consider one third of the households net income for the period, and not to include housing benefit.

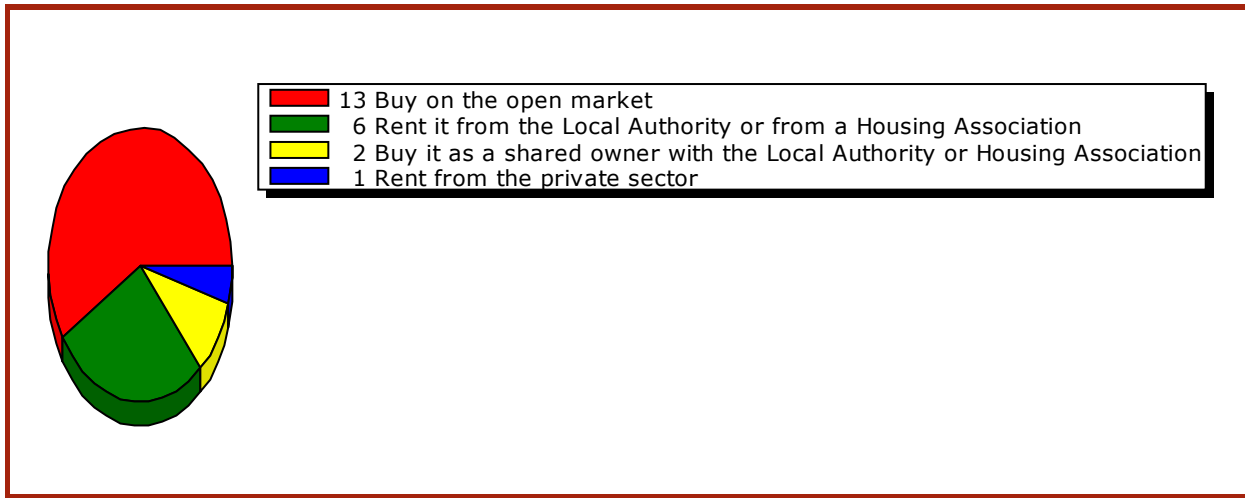

Q15. How much would the household be able to afford if the household were buying a property? (19)

Respondents were asked to consider three times the household's gross income for mortgage purposes plus any savings and equity the household may have in any property.

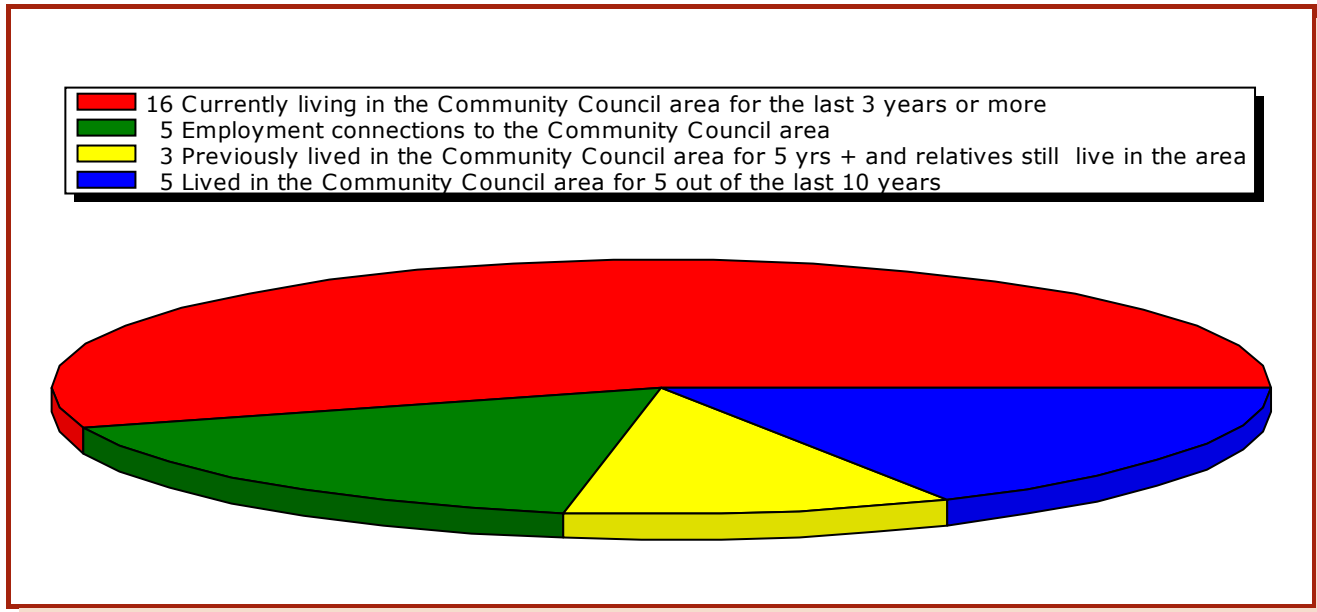

Q16. How would this household consider paying for this accommodation? (TV = 22)

Q17. In which area would the household consider living? (TV = 21)

**Q18. Do you have a local connection with your community of first choice?
(TV = 29)**

Q19. Is the household currently on the Council, or Housing Association, housing transfer or waiting list? (21)

5. ANALYSIS OF SECTION 3 COMPLETED BY ALL HOUSEHOLDS.

All the respondents were asked to complete part 3 of the questionnaire. The purpose of this section is to identify the community's feelings towards a affordable housing development in the area.

Percentages in this section apply to the number of respondents to the survey (126) who answered that particular question. This is known as adjusted percentage.

Q20. Apart from you or anyone currently in your household, do you know anyone with a local connection who is not currently residing in the Hook area area that would like to or need to set up home in the Hook area?

Q21. Would you Support a small local development of affordable housing to meet local need in the area?

Q22. Are there any comments you would wish to make regarding affordable housing in the Hook area?

(PLEASE SEE ADDENDIX 1)

6. AFFORDABILITY OF MOVING

This section considers the financial information given by the households in Questions 14 and 15 in regard to how much households would be able to afford if they were buying or renting a property. The information is compared to Open-market house prices, private rentals market and social housing rental prices.

Open-Market Property Price Data (from Land Registry)

Average sale prices by type from July 2007 to Sept 2007 for the Hook area and surrounding areas and number of Sales for postcode sector SA62 4.

Detached	£264,700	Sales	10
Semi-detached	NIL	Sales	NIL
Terraced	NIL	Sales	NIL
Flat/Maisonette	NIL	Sales	NIL
Average Price	£264,700	Total Sales	10

The average residential property sale price for Pembrokeshire from July 2007 to Sept 2007 for Pembrokeshire was £162,077 (Land Registry).

Private Rental Data (From Local estate agents in September 07) for the Hook area

The following data was obtained from local Estate Agents in October 2007. No properties were able to be found that were available to rent on the open market in the Hook area at the time. The figures given below are estimates of the average rental prices for the Hook area from local estate agents. A number of estate agents also stated that availability of private rented property was limited in the Hook area.

Detached 4 bedroom	£700/£750pcm (approximately)
Semi-detached/Terraced 3 bedroom	£525/£575pcm (approximately)
Flat/Maisonette 2 bedroom	£450/£475pcm (approximately)

Social Housing Rental Data

The following data is a snapshot of the available social housing stock owned and managed by Pembrokeshire County Council and the Registered Social Landlord (Pembrokeshire Housing) in the Hook Community Council area. The rental figure is the average for Pembrokeshire County Council owned properties in the Hook Community Council area, and was obtained from Pembrokeshire County Councils, Social Care and Housing Directorate.

Pembrokeshire County Council Housing Stock for Hook Community Council area

	Units	Turnover (From 2002 – 2007)
General Needs Properties	23	16

Average Local Authority Weekly rents for Hook Community Council area

Based on 2006/2007 rental values and excluding services e.g. water rates

All Properties **£53.74 per week**

Registered Social Landlord (Pembrokeshire Housing) Stock for Hook Community Council area

	Units	Turnover (From 2002 – 2007)
General Needs Properties	9	5

Average Registered Social Landlord (Pembrokeshire Housing) Weekly rents for Hook Community Council area

All Properties **£61.14 per week**

Affordability

Affordability - Ability to purchase a property on the open market:

It is clear that the majority of those households who expressed themselves as being in housing need could not afford to purchase a property on the open market. Of the respondents who answered Question 15 on how much they would be able to afford if they were buying a property, 7 households indicated they could afford prices ranging from between £40,000 to £120,000, which means they would have difficulty in being able to afford to purchase a property in the Hook area on the open market.

The average sale price in the Hook area from July 07 - Sept 07 was £264,700 (Land Registry). As these prices are averages, there may have been some properties that will have been lower in price. Some of these may have been affordable to some respondents.

11 households indicated they could afford over £180,000. So these respondents may be able to meet their housing needs on the open market. But they might find it difficult finding suitable accommodation at that price level in the Hook area.

Affordability - Ability to rent a private property on the open market:

Of the respondents who answered Question 14 on affordable rental levels, 6 households indicated that prices ranging from £50 (£216pcm) - £90 per week (£390pcm) would be affordable for them.

None of these households could afford to rent a property on the open market based on the estimated average rental prices listed previously.

The other 12 respondents to this question stated they could afford prices ranging from between £120 per week to over £150 per week. It is clear that some of these respondents could possibly afford to rent in the private market, but based on the evidence collected from local estate agents, they might find limited availability of suitable private properties to rent in the area.

SOCIAL HOUSING

Rental costs for 2 and 3 bedroom properties of Social housing throughout Pembrokeshire range from £50 - £65per week. It is clear that the majority of people who expressed themselves as being in housing need and looking to rent, could afford to rent social housing.

The turnover (the frequency with which properties are let) of these properties is reasonable in the area, 16 lettings since 2002 for Local Authority owned property and 5 lettings since 2002 for Pembrokehire Housing owned properties. But it should be noted that these properties are also subject to qualification and personal circumstances, and are not restricted to local occupancy. Therefore, the waiting list can include households from outside the area. This in turn, reduces the chances for local people to be housed.

7. CONCLUSIONS

The majority of households who identified themselves in need would not be able to rent or purchase a property on the open market in the Hook Community Council area. Also the availability of properties to rent on a long term tenancy basis appears to be limited. The housing market is clearly not serving all the people of Hook Community Council area, justifying an interventionist policy in relation to the provision of affordable housing for local people.

It is clear that the majority of people who expressed themselves as being in housing need and looking to rent, could afford to rent social housing. However it should be noted that the availability of such properties which are restricted to local occupancy is minimal.

The people who identified themselves as being in housing need generally wanted to move within the Hook area, which tells us that it is desirable to meet locally identified need with local developments.

21 households identified themselves in housing need and it is normally assumed that a proportion of this need will satisfy its housing requirement over time and some will naturally move away from the area irrespective of their housing need. Therefore, if a third to a half of this need is taken as a guideline of actual need, we can surmise that 7-11 households are in need of affordable housing.

Affordable housing developed under affordable housing policies can have occupancy restrictions placed upon them where a private developer is involved. Welsh Assembly Government (WAG) Guidance asks that occupancy restrictions are not placed on Housing Association developments where the proposal is within the settlement. On rural exception sites WAG advises that the local planning authority needs to ensure that the housing continues to serve its intended purpose in the future, and will need to satisfy itself of the adequacy of controls that the Housing Association is operating, in terms of occupancy and affordability. If the controls are considered to be inadequate, then occupancy

controls can be justified.

Policies in the Joint Unitary Development Plan allow for the negotiation of affordable housing, as part of an open market development, or as a rural exceptions site scheme. Both could have occupancy restrictions to local people only. Therefore the specific affordable local housing need identified in this survey could be served by a specific affordable local housing solution, with any future affordable housing for the Hook Community Council area.

The survey was conducted at one particular time and is worth noting that local affordable housing needs could be a changing requirement.

Appendix 1

Q22

The problem is made much worse due to the selling off of council rented properties being lost to the very people who deserve a home to live in. Questionable deals have been struck by a third person ghosting the purchase and a precious home is lost forever.

I think the council should be able to transfer people from family homes into suitable accommodation. Several homes in Hook are now occupied by one person and they have housing for a family home. Also I think this passing it on should stop and that the council should impose checks. Also I think local Authority housing should be kept tidy to L/A standards and again should be checked.

Too late for this! Hook has become too over populated with ridiculous planning approvals for large expensive luxury homes. This should have been considered 10 years ago. The current property developers do not consider affordable housing but only on their profit margins. Also, it is already taking 40 minutes to commute to Haverfordwest. This will probably add to the congestion unless suitable road infrastructures are also addressed.

Planning permission is being given for land which is unsuitable for housing. I don't think Hook can accommodate big housing estates. The roads through the village are dangerous now. Does it need someone to get killed before the planners and developers wake up Hook is a very nice village to live in. Please don't spoil it and make it into a town.

The sewerage plant needs enlarging before any more houses are built in Hook!

The local infrastructure does not support any further developments. Housing policy does not specify occupancy by local people. Local Authority and Housing Association do not house local people and attract anyone.

We would support affordable housing for locals, on the understanding that it stayed within those aims, not sold at a reduced rate following x amount of years of occupancy then sold to outsiders at a profit.

In view of the experience of the neighbouring village of Freystrop in which a similar development seems to have increased the occurrence of bad behaviour and minor crime, We would be against any such development in Hook.

One concern would be the vetting of undesirables who would be allocated the housing. I am no snob but we do not want a 'Mount Estate' either.

Seems to be a lot of residences being built already.

There are too many houses being built in Hook already we don't need any more. It is not a village now it is a small town.

There are too many properties in the village and the roads have become too busy and Hook which was a nice village has been spoilt by over development and houses are becoming jammed in where ever possible. Affordable housing should have been built long ago instead of these big houses which have devastated this community. I have lived in the village all my life which is 37 years so I have seen the changes. I am sure you will go ahead with what ever you want just like the past years no matter what we say as a community.

We feel that Hook community Council area has become built up enough for a semi rural location and that any further development projects would take it over the top and ruin completely what once was a nice village location!!!

Hook as a village is totally ruined the days of nice quiet village have gone Hook is like a town now and full of strangers. I have lived in Hook nearly all my life, and it will never be the same village of 35 years ago when everybody knew each other. P.S. go and build somewhere else.

Improve sewage, improve road between Hook and Freystrop.

Experience of poor planning and no further checks made countryside eroded, mature trees felled and no hedging replaced where supposed.

Every garden and spot of land has already been built on. Hook is totally saturated with houses. The infrastructure such as drains and roads cannot take anymore. The only areas left are the small amount of green fields in the centre of the village and it would be a tragedy if built upon as this is the only area where you can walk or for children to have some freedom.

Small developments are not, in my opinion in the best interests of local people. They tend to have very small gardens and no immediate play area for children. IN a village like Hook all properties should have room/space for residents to live a fully rural life.

Hook needs a wider road before anymore housing is built. At the moment its a mile of dangerous bends.

Plans should not have been passed to allow such property. More affordable houses should have been built, example Pill Road which are priced out of first time buyers reach.

I hope that my children will move out to other areas in the UK.

As small Housing project is in advanced planning by Eaton Field Holdings. This is on West Hook Road. The local infrastructure can not support the number of people presently resident here. I would be strongly against any further development until road access to the village and local amenities are substantially improved.

Not another Development apart from the one soon to be built in Hook.

Nice rural villages are being taken over by developers affordable housing where there will be no green pastures left. Also our village has tight roads so an increase in traffic would cause problems Sewage is not equipped for the houses we got.

The villages housing stock is substantially overpriced for the great majority of young people. There is a major need for either low price property or more public rental accommodation.

We do not agree with the current right to buy association housing and council housing as we consider that this has helped cause the affordable housing shortage.

Better road infrastructure in and around Hook desperately needed. Pavements in Pill Road are of an insufficient width. Extreme danger to the increasing number of residents, particularly the younger element.

As long as careful consideration was given to the siting of such Housing. At the moment hook seems to be having properties developed on any tiny piece of land going.

We are please that there is such a position called 'Rural Housing Enabler' and that future planning is being looked at, compared to random ad hoch expansion. What about a flat pack eco home development.

I feel that there are already too many houses being built in the area.

There are enough properties for sale in Hook at the present time to suit all buyers. These properties have been on the market for some time. There is no immediate requirement for further Housing in this area.

We like the prestige that Hook offers.

Please please do not spoil this area and allow it to become one big housing development area. This community has very few facilities as it is. Having moved from an over developed area trust me there is nothing worst.

Hook village would be in danger of losing its character in the face of further development.

It would be nice to see the local planning Authority work fairly and without the "old school" networking.

Appendix 2

Hook Community Council

Local Housing Census

Dear Resident,

The Community Council is aware that the provision of affordable rural housing is a very important topic, and would like to ask you to complete the enclosed questionnaire in order to assess the local situation.

The Rural Housing Enabler for Pembrokeshire has been asked to conduct a census of local housing on behalf of the Hook Community Council.

The questionnaire is being sent to all residents within this area and will only take 5-10 minutes to complete. Your views are important, even if you do not intend to move in the near future please complete sections 1 and 3.

In addition to establishing the needs of the current community we hope to hear about the requirements of households with a local connection who need to relocate to the area. This is often people who have moved away, but in general terms means that they have strong family or residential links to the area, people who are employed in the area and people who need to receive or provide care for a relative in the area.

Your answers will be confidentially analysed by the Rural Housing Enabler and the data will be reported in a way that no individuals or households could be identified. This questionnaire gathers information which may contribute towards future housing strategy in the Hook area. If appropriate the findings may be used to justify the need for a small scheme of affordable homes in the area for local people.

Please return the completed form in the freepost envelope provided within the next 14-21 days

Thank you in advance for helping with this important work.

Hook Community Council

Appendix 3

HOOK COMMUNITY COUNCIL LOCAL HOUSING NEEDS SURVEY

SECTION 1: Your Home And Your Household

This Section asks questions about your current household and the home in which you live. We are defining a household as "one person living alone, or a group of people (not necessarily related) living at the same address with common housekeeping - sharing either a living room or sitting room, or at least one meal a day".

Q1. Is this your main home?

Yes, main home

No, second home **There is no need to complete the rest of the form, however please return it using the envelope provided.**

Q2. What type of house does your household live in? (Please tick one box)

Semi-detached

Detached house

Bungalow

Terraced house

Apartment/Flat

Mobile home (permanently sited)

Other (please specify) _____

Q3. Does your household own or rent this home? (Please tick one box)

Owns (with or without a mortgage)

Rents privately

Rents from the council or Housing Association

Rents from employer or tied with job of household member

Owns (shared ownership scheme with Housing Association)

Other (please specify) _____

Q4. How long have you lived in...? Please tick one box per option

	Less than 6 months	6 months to 3 years	More than 3 years but less than 10 years	More than 10 years
This Home	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Hook Area	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pembrokeshire	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Q9. How would you describe this household? (Please tick one box)

- Single person
- Family (one or two adults with children)
- Couple
- Other

Q10. How Many bedrooms would you expect to need? (Please tick one box)

- 1
- 2
- 3
- 4
- 5 +

Q11. Why does your current home not meet your need? (Please tick all that apply)

- Too small
- Too large
- Needs major repairs
- Unsuitable for physical needs
- Temporary accommodation
- Other (please specify) _____
- Need to live close to employment
- Need to live close to relative/family
- Need to live closer to a carer or to give care
- Want to live independently
- Being harassed

Q12. When would your household expect to need to move?

(Please tick one box)

- Immediately
- Within 1 year
- More than 1 year, but within 3 years
- Between 3 and 5 years

Q13. Does this household have a specialised housing need? (Please tick all boxes that apply)

- No
- Yes, accommodation on the ground floor
- Yes, sheltered housing with support services provided
- Yes, other housing with support services provided
- Yes residential care
- Other (Please specify) _____

Q14. How much would the household be able to afford if renting? It is normal to consider one third of the households net income for the period. Please do not include housing benefit. (Please tick one box)

- | | |
|--|----------------------------|
| <input type="checkbox"/> up to £50 (per week) | (Up to £220 per month) |
| <input type="checkbox"/> £51 to £70 (per week) | (£221 to £300 per month) |
| <input type="checkbox"/> £71 to £90 (per week) | (£301 to £390 per month) |
| <input type="checkbox"/> £91 to £120 (per week) | (£391 to £520 per month) |
| <input type="checkbox"/> £121 to £150 (per week) | (£521 to £ 650 per month) |
| <input type="checkbox"/> More than £150 (per week) | (More than £650 per month) |

Q15. How much would the household be able to afford if buying a property? It is normal to consider three times the household's gross income for mortgage purposes plus any savings and equity the household may have in any property. (Please tick one box)

- | | |
|---|---|
| <input type="checkbox"/> Up to £40,000 | <input type="checkbox"/> £120,001 to £140,000 |
| <input type="checkbox"/> £40,001 to £60,000 | <input type="checkbox"/> £140,001 to £160,000 |
| <input type="checkbox"/> £60,001 to £80,000 | <input type="checkbox"/> £160,001 to £180,000 |
| <input type="checkbox"/> £80,001 to £100,000 | <input type="checkbox"/> More than £180,000 |
| <input type="checkbox"/> £100,001 to £120,000 | |

Q16. How would this household consider paying for this accommodation? (Please tick as many boxes as apply)

- Buy on the open market
- Rent from the private sector
- Rent it from the Local Authority or from a Housing Association
- Buy it as a shared owner with the Local Authority or Housing Association
- Other (please specify) _____

Q17. In which area would the household consider living? (Please tick as many boxes as apply)

- Hook Area
- Neighbouring Communities
- Elsewhere in Pembrokeshire (Please specify) _____
- Other (Please specify) _____

**Q18. Do you have a local connection with your community of first choice?
(Please tick as many boxes as apply)**

- Currently living in the Community Council area as your principal residence and have been doing so for the last 3 years or more
- Employment connections to the Community Council area
- Previously lived in the Community Council area for a period of 5 years or more and still have close relatives living in the Community Council area
- Lived in the Community Council area for 5 out of the last 10 years
- Need to care for an infirm or elderly relative in the Community Council area
- Need to receive care from a relative in the Community Council area
- Other (please specify) _____

Q19. Is the household currently on the Council, or Housing Association, housing transfer or waiting list? (please tick one box)

- Yes No

NB This questionnaire does not register you on a housing waiting list. If you wish to apply to go on the list, please contact Pembrokeshire County Council on 01437 764551 or Pembrokeshire Housing on 01437 763688.

Contact Details

If you provide your details below, you may be contacted if a housing scheme progresses in this community.

NAME: _____

ADDRESS: _____

POSTCODE: _____

Please go to Section 3

SECTION 3: Views on local affordable housing

This section is to find out about local people's views on new housing in the area. All replies will be treated in the strictest confidence, however anonymised comments and reasons may be included in reports.

Q20. Apart from you or anyone currently in your household, do you know anyone with a 'local connection' who is not currently residing in the Hook area that would like to or need to set up home in the Hook area?

Yes

No

If they wish to be included in this survey for affordable housing they will need to obtain a form either by contacting the Rural Housing Enabler please find his contact details on the last page.

Q21. If a need is identified, would you support a small development of affordable housing for local people in the Hook area? (Please tick one box)

Yes

No

Maybe

Q22. If you wish to make any other comments please write them here.

If you know of any suitable sites, available land or property within the Hook area that could be used for a local affordable housing scheme please list them here. Please also add your contact details.

Thank you for completing this survey. Please return the completed form in the freepost envelope provided within the next 14-21 days.

If you require an Additional Household or Non-resident questionnaire form please contact:
